Status of ingesting data to Europeana

- For the September harvesting of Europeana, datasets of the first three APEX providers (Estonia, Finland, Sweden), plus updated information from The Netherlands have been delivered to Europeana successfully
- The delivery encompassed 9.6 million provided cultural heritage objects (providedCHO) with links to more than 40 million digital archival objects
- There are about 30.000 additional providedCHO ready to be harvested (Austria, Czech Republic, Sweden), that will be used for new tests in early to mid-December 2013

Administrative aspects – Europeana DEA

- Parties
 - Europeana and Data Providers
- General aspects
 - On the part of Europeana:
 - » Provide access to Europe’s cultural and scientific heritage
 - » Ingest, index, enrich and make available descriptive metadata and previews on objects that are part of this heritage
 - » Make all metadata in its database available for re-use to all its Data Providers and the public at large
 - On the part of the Data Provider:
 - » Make (a part of) existing (and/or to be created) metadata and previews available to this database under the conditions of the DEA
 - » Defining whatever data is given to Europeana under the conditions of the DEA as metadata

Europeana DEA – note aside

- Definition within the Europeana Data Model (EDM)
 - <edm:dataProvider>
 - » Name of the organisation who supplies data to Europeana indirectly via an aggregator
 - » If an organisation provides data directly to Europeana, this equals the value of <edm:provider>
 - <edm:provider>
 - » Name of the organisation that sends data to Europeana
 - » Not necessarily the institution that holds or owns the original or digitised object
 - » Usually the name of an aggregator

Europeana DEA – note aside

Europeana DEA

- Definitions

- **Metadata** = textual information (including hyperlinks) that may serve to identify, discover, interpret and/or manage Content
- Content = a physical or digital object that is part of Europe's cultural and/or scientific heritage held by the Data Provider
- **Preview** = a reduced size or length audio and/or visual representation of Content, in the form of one or more images, text files, audio files and/or moving image files

Europeana DEA

- Licensing model for metadata
 - Publication by Europeana under the terms of the CC0 1.0 Universal Public Domain Declaration
 - Allows the reuse of metadata without restrictions, payment or prior authorization
 - Anybody is free to use the metadata for whatever purpose they wish, without restriction
 - Europeana encourages users to respect metadata that they reuse by always attributing and linking to the original source
 - When Europeana publishes metadata that can be (in whole or in part) attributed to the Data Provider, Europeana is obliged to give attribution

Europeana DEA

- Licensing model for previews as representations of the object
 - As specified in the element <edm:rights>
 - Indicating the copyright status of an object
 - For users of Europeana.eu this copyright information also applies to the preview provided
 - Possible values are:
 - » CC0
 - » Creative Commons Public Domain Mark
 - » Six different Creative Commons licenses (CC-BY, CC-BY-SA, CC-BY-ND, CC-ND-SA, CC-BY-NC, CC-NC-SA)
 - » Four Europeana rights statements (Free access, Restricted access, Paid access, Unknown)

APE_x

APE_x project co-funded by the European Commission within the framework of the ICT Policy Support Programme

Open tasks in APEX WP2

- 1-step conversion from apeEAD to EDM
- Complete hierarchical objects delivery to and display by Europeana
 - Intermediate levels usually don't have a „digital object“, though might have a web resource
- 1:n-relation between <edm:ProvidedCHO> and <edm:WebResource>
- *Possibly introducing apeMETS and apeMETSRights for option of having rights information on more detailed level*
- *Possibly integrating <edm:agent> based on apeEAC-CPF*
